## X (Twitter) Connection Onboarding

Client account setup checklist

Date: \_\_\_\_\_

### Overview

This onboarding guide explains what is required to connect a client X (Twitter) account to the Dott Media platform for publishing and engagement tracking.

**Estimated time: 20-35 minutes**

### Account prerequisites

- X (Twitter) account with posting access.
- X Developer account with an approved Project + App.
- App permissions set to Read and Write.
- Elevated access if required for posting endpoints.

### Technical prerequisites

- OAuth 1.0a access token and access secret generated.
- API key and API secret configured in the developer portal.
- Callback URLs set (if required by the app).

### Required credentials

Credential	Why it is needed
Access token	Authenticate the X account for API requests.
Access token secret	Complete OAuth 1.0a signing for API calls.

### Connection steps

1. Create an X Developer Project and App.

2. Set App permissions to Read and Write.
3. Generate an Access Token and Access Token Secret for the client account.
4. Save the Access Token and Secret in Dott Media.

### Data we store per user

- X access token.
- X access token secret.

### Verification checklist

- X status shows Connected in the Integrations screen.
- Test post succeeds.
- Engagement metrics appear in reporting.
